1.Nate Gagnon:

I really like this design because I love the minimalist style, I think that its really clean and its all very orderly and clear so that the person that visits the page has a clear idea of what to do to get to where he wants to go to find what he wants.
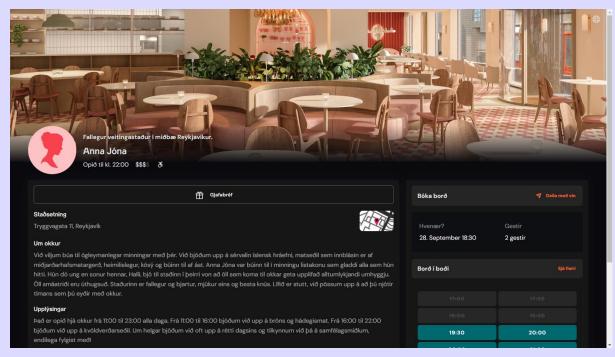

2.Anna Jóna:

I really love this design because its also so clean and has very well-made animations that are so fluid, it's a really pretty and intuitive webpage, I love those types of webpages.
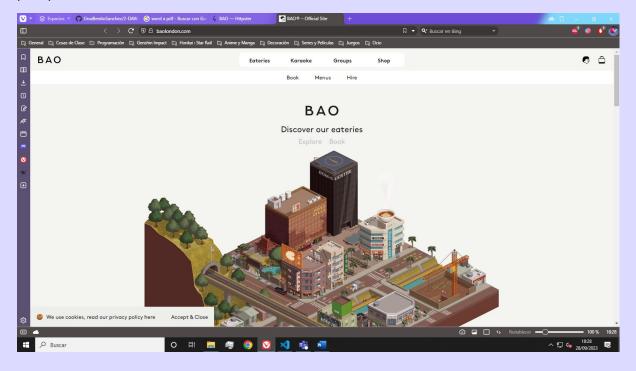

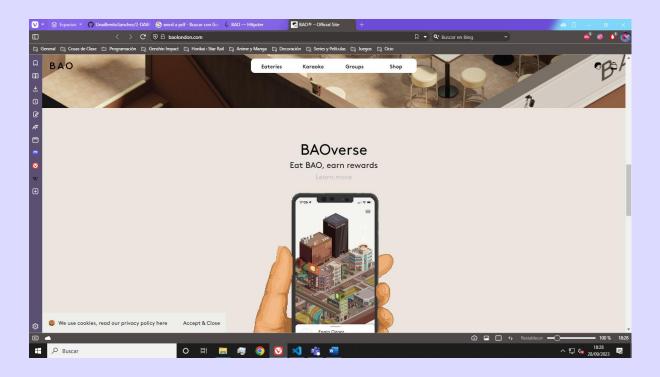

3.BAO:

The reason why I like bao is because, like in Nate Gagnon, its very clean and intuitive, and its kind pretty too.
